

Epidural Mini-Tray

Part of Vygon's Regional Anaesthesia Product Range

Epidural Mini-Tray

Vygon's extensive Regional Anaesthesia range now includes epidural mini-trays. These provide the essential components for epidural pain management.

10ml Loss of Resistance Syringe

With yellow plunger to identify epidural use and help reduce the risk of wrong route drug errors.

Tuohy Needle

8cm needle available in 16G and 18G, with 1cm depth markings to aid insertion.

Removable wings to provide choice of insertion technique.

Plastic colour-coded stylet with a notch to indicate the direction of the bevel, aiding accurate catheter placement.

Easy Lock Connector

Provides a secure connection between the catheter and filter to minimise the risk of disconnection.

Yellow colouring aids identification as an epidural catheter and helps reduce the risk of wrong route drug errors.

Antibacterial Filter 0.22µm

Prevents the passage of particles or bacterial contaminants into the catheter.

Catheter Label

Yellow Epidural label for epidural catheter identification to help reduce the risk of wrong route drug errors.

Epidural Catheter

Transparent catheter with three lateral eyes to optimise drug delivery. Clear markings from 5-15cms aid insertion to correct length, and allow easy observation, should catheter migration occur.

Pre-mounted guide for ease of insertion through the Tuohy needle.

Ordering Information

Vygon Code	NPC Code	Tuohy Needle			Catheter		Box Quantity
		Gauge	Length	Colour	Gauge	Length	
80.189.321	FYV034	16	8cm	○	19	90cm	20
80.189.322	FYV035	18	8cm	●	20	90cm	20
