The example NHS Trust customised cannulation pack

As part of the Trust's drive towards the Department of Health's Saving Lives High Impact Intervention No.2, the Trust is implementing a customised cannulation pack. A photograph of the content is shown below.

- | | |
|---|---|
| ● Biovalve drape | To be used as a sterile field under the patients arm |
| ● Hospital insertion label | Label used for documentation of insertion |
| ● Swab 7.5cm x 7.5cm, 4ply white | To clean any excess blood from cannulation |
| ● Tegaderm dressing | Used to fix the cannula in place |
| ● Clinell wipe | (for use on medical devices) - Used to disinfect the skin prior to cannula insertion (trust policy) |
| ● Bionector 5222.014 or 841.232 | Closed needle free device attached to each cannula |
